

Acrylic Jig Set for the MPX-50, 60 & 70

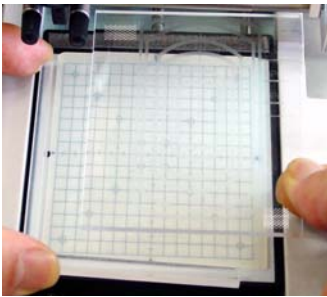

Instructions

Double-sided tape*

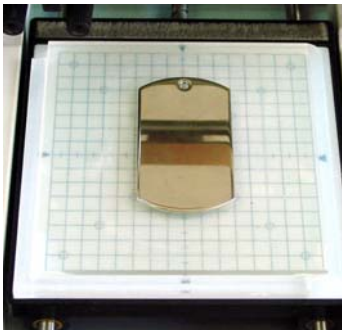

Double-sided tape*

1. Attach double sided tape to the jig at opposite corners.

2. **Align the cross hairs on the jig with the cross hairs on the base pad, and stick to the base pad.

MPX-70 Shown (Steps are the same for the 60 & 50)

3. Select the pendant and affix it to the ***jig, using double-sided tape.
4. Level the pendant with your paddle.

*MPX-70 users may not need any tape on the base-pad due to the sticky nature of that base-pad.

** Note: Please make sure that your machine is calibrated to the x and y axis center before using the templates.

***The jigs are laser etched with the outline shape and its shape number so you can easily position and key them to our downloadable templates in our Resources link.
