

How to install the MPX-80 and MPX-90... Shape Templates in Metaza Studio:

Unzip, and install as follows...

C drive >> Documents and Settings >> All Users >> Application Data >> Roland DG Corporation >> METAZAStudio >> Material >> add the unzip files here.

If Metaza Studio is already open, you must exit and restart to see the shapes.

In Metaza Studio, go to View>Material... select your file shape.
